

Amendments to the Specification:

Please replace the paragraph beginning at page 14, line 11 with the following paragraph:

Fig. ~~4D 6D~~ shows an example display offering for wireless imaging device 87 in Fig. 1, for the business relationships shown in Fig. 3. In this example, the order terminal 87 allows a user to order clothing, but does not allow a user to order furniture. When the user decides to order clothing, screen 242 is displayed on the display 97 of order terminal 87. Screen 242 enables the user to select one of two different clothing providers, provider #3 (Lands End), which has a domestic relationship with business entity D, and provider #1 (Sears), which has a friendly ~~neutral~~ relationship with business entity D, as shown in Fig. 3. Screen 242 does not enable the user to select provider #2 (Penneys), which has a hostile relationship with business entity ~~A~~ D. The information for provider #3 is shown first, since there is a closer relationship with this provider than with provider ~~#3~~ #1. The prices displayed also correspond to the business relationships.
